Lille, FRANCE

EXPERIENCE

Electronic Voting Engineer

Gedivote

November 2025 – Present

Remote

- Platform development (general, security and cryptography)

Security Research on Internet Voting

CNRS

March 2025 – August 2025

Nancy

- Design of voting protocols
- Development of zero-knowledge proofs
- Formal verification with ProVerif

Fullstack Developer - React + e-voting

Scrutin.app

February 2023 – February 2025

Remote

- Design of an open-source web and mobile internet voting software
- Development of a Belenios implementation

Fullstack Developer - Django + e-voting

Electis

July 2022 – January 2023

Paris

- ElectionGuard integration
- Adaptations for works council elections

Fullstack Developer - Ruby on rails + Vue

Winddle

August 2021 – May 2022

Paris

Replacement of Backbone.js logic with Vue.js and SQL query optimization.

Cybersecurity Engineer

Stormshield

November 2020 – July 2021

Lille

Development around TPM, IPSEC, and FreeBSD.

C++ Developer - Video Games

Eko Software

September 2014 – October 2020

Paris

Development of a game engine running on multiple platforms (PS3, PS4, Xbox One, Switch). GPU and shader development. Creation of web tools for managing player databases.

EDUCATION

Master's in Computer Science and Cybersecurity

University of Lille

September 2023 – August 2025

Computer Science Training

École 42

September 2013 – June 2014

Bachelor's in Computer Science

Pierre and Marie Curie University (Paris VI, now Sorbonne University)

September 2009 – June 2013

Self-taught Learning

127.0.0.1

December 1991 – Present

Site du Zéro, Developpez.net, Coursera, IRC, Stack Overflow, ArchWiki, /usr/bin/man

Spanish ● ● ● ● ●

PROJECTS

Scrutin.app

📅 2023 - Present

An *easy-to-use* and *secure* internet voting platform based on the Belenios voting protocol (React Native + Node.js). (source) (demo) (doc)

Sirona

📅 2024 - Present

A tool to interact with elections created with Belenios.

Posca (contributor)

📅 2024

A Matrix client with social network features

Kazarma (contributor)

📅 2023

A Matrix <-> ActivityPub bridge

Zero

📅 2023

A prototype of metadata-free messaging inspired by Bitmessage.

Ami

📅 2013 - ...

A hackable homepage, self-hosted or local. Currently delegates to other sites (Wikipedia, ...) based on bangs (!w, ...). Usable as a default search engine in Firefox. (v1) (v2) (v3)

Safebook

📅 2011 - ... (paused)

An experiment in end-to-end encrypted social networking. Originally a browser extension adding an "Encrypt and send" button to Facebook and decrypting friends' messages on the fly.
